Chip Technology and Green Design

Monday, January 7, 2008 - Lunch Meeting

TOPIC:

1. Our Changing World: The impact of changes in our environment on our world
2. Chip Technology - Then & Now: How microprocessor technology is changing and it's many uses
3. What Chips mean to you: How microprocessors can be utilized to help the HVAC industry
4. How Green will we be: What is the future of sustainability and will it be fully realized?

SPEAKER:

John, 'Rip' Van Winkle is an entrepreneur at heart from A to Z. He served his apprenticeship as an electrician before attending college in electrical and mechanical design. Schooling spearheaded him into owning his own electrical contracting business. After 11 years, he sold his contracting business and started a design service. This service provided designs and design and build solutions for Ford Motor, GE Aircraft Engines, Boots & Coots, Miller Brewing, Ball Jar, DHL, and Celanese to name a few. He has served as an adviser for various Vocational Schools, Butler Corp., Tokhiem corp., & Corrugated Adhesives. He is currently serving these industries and actively searching for the next design challenge.

MEETING LOCATION:

The University of Louisville Alumni Club from 11:30 until 1:00 pm

The cost for attending is \$20.00, cash or check (made payable to ASHRAE). Students and university facility may attend for \$5.00. Due to our current arrangements with the University Club, reservations are not cancelable after 5:00 PM Thursday prior to the meeting date. We want to encourage attendance, but emphasize the importance of notifying the treasurer if plans to attend have changed. Your consideration will help avoid meeting fee increases to offset losses associated with extra meal preparation.

It is extremely important to make your reservation no later than Thursday, January 3rd with Julian Donahue by simply using one of the following three options: 1) Calling (502) 569-3600 x 2422 2) E-mail jdonahue@lwcky.com.
