Using Ultra Violet Light to Improve Indoor Air Quality

Monday, September 8, 2008 - Dinner Meeting

Topic:

The subject of UV Technology/Science is key to the ever growing focus on indoor air quality. The discussion will focus on the science of UV Technology and provide definitions of the various types of UV purification available in today's market. Once the basic definition groundwork is laid, Mr. Moore will discuss the various applications associated with the use of UV technology and will explore the new ASHRAE Specification related to the use and application of Ultraviolet Technology.

SPEAKER:

Matt Moore is a graduate of the Indiana University Kelley School of Business. He graduated with degrees in Marketing and Management. He has been in the HVAC/R Industry for 16 years. While attending high school and college he worked in HVAC/R Wholesale Distribution in warehouse, delivery, and counter sales. After graduating college, he took a position as Sales Engineer with Emerson, Alco Controls Division. After his stint with Alco Controls, he began working as a Manufacturers' Representative for Podvin Sales which eventually became Moore Sales Corporation. He has been providing Ultraviolet Technologies about 8 years into residential and commercial applications. He regularly works with HVAC/R Wholesale Distributors and Contractors to train them on the principles and applications of UV along with providing engineering, and performance data testing.

MEETING LOCATION:

The University of Louisville Alumni Club from 5:30 until 8:00 pm

The cost for attending is \$25.00, cash or check (made payable to ASHRAE). Students and university facility may attend for \$5.00. Due to our current arrangements with the University Club, reservations are not cancelable after 5:00 PM Thursday prior to the meeting date. We want to encourage attendance, but emphasize the importance of notifying the treasurer if plans to attend have changed. Your consideration will help avoid meeting fee increases to offset losses associated with extra meal preparation.

It is extremely important to make your reservation no later than Thursday, September 4th with Julian Donahue by simply using one of the following three options: 1) Calling (502) 569-3600 x 2422 2) E-mail jdonahue@lwcky.com.

- March 2 – Dinner meeting at the University of Louisville Vogt Building, Joint meeting with ASME, Student Presentations
- April 6 - Lunch meeting at the Alumni Club, Barry Benator with Benator Inc., “Characteristics and Competencies of Outstanding Leaders”
- May 11 – Golf Scramble, Location TBA

MESSAGE FROM THE CHAPTER PRESIDENT

By Luke Powell

Welcome to the 2008-2009 ASHRAE year. I am looking forward to serving as your President for the upcoming year. I would like to thank Joe Nitzken, our outgoing president for leaving the chapter in great shape! Joe and I represented the Louisville Chapter at the regional conference in Memphis last month. We came home with several awards that we will be presenting at the September meeting.

One of the main goals for this year is to bring back the Louisville Chapter Membership Roster and Service Directory. It’s been 7 years since we had one published and it’s time to get a new one out to our members. We will have the current roster at the September and October meetings, so be sure and check all of your contact info for accuracy before the directory heads to the printers. To all rep organizations, contractors and consultants...get ready for me to hit you up for advertising in the new directory!

Jeff Murphy, our Programs Chair, has some great programs and events already lined up for the upcoming year. Be sure and check out the chapter website at www.louisville.ashraeregion7.org for all the details!

Speaking of our chapter website...it’s had a makeover. Matthew Nitzken has been working hard to update our website and has committed to keep it updated all year long. So check out the website frequently for the latest chapter news and events, as well as a look back at our chapter history.
