Introduction to KPPC

Speaker: Cam Metcalf

Monday, November 2, 2009

University of Louisville Alumni Club from 11:30 to 1:00 pm

It is extremely important to make your reservation no later than Wednesday, October 28th with Ross Wojcik by simply using one of the following two options: 1) Calling (502) 939-4110 or 2) E-mail ross.wojcik@insightbb.com.

The cost for attending is \$20.00, cash or check (made payable to ASHRAE). Students and university facility may attend for \$5.00. Due to our current arrangements with the University Club, reservations are not cancelable after 5:00 PM Thursday prior to the meeting date.

Topic:

KPPC's responsibilities and duties to client needs and energy efficient technology advancement including:

- KREC (Kentucky Renewable Energy Consortium) funded technologies that have been implemented to solve the client's "pain", facilitating a team approach and helping the client identify opportunities.
- Financing initial technology, and setting up demonstrations of technologies at client's facilities for the client to keep.
- Conditioning the market for deployment of proven P2 (pollution prevention) and E2 (energy efficient) technologies.
- Case studies on successful projects.
- Introduction to the latest in P2 and E2 equipment and programs.

Speaker:

Cam Metcalf
Executive Director, Kentucky Pollution Prevention Center

Cam Metcalf is a national leader in pollution prevention, energy efficiency and sustainability. He joined the Kentucky Pollution Prevention Center (KPPC) as Executive Director in 1995.

His experience includes tenures at the University of Tennessee's Center for Industrial Services, University of North Carolina-Asheville, and the U.S. Environmental Protection Agency. Cam holds an M.S. in Civil Engineering & Environmental Science.

Appointed by the Governor of Kentucky, he currently serves on the Board of Directors for the Conn Center for Renewable Energy Research and Environmental Stewardship, and on the Drought Mitigation and Response Advisory Council. He is also a member of the University of Louisville Sustainability Council.

MESSAGE FROM THE CHAPTER PRESIDENT

Hello Everyone,

We are continuing our excellent season of valued programs! The plant tour at Gordon Foods this past month was an excellent opportunity to see refrigeration in action! Our program in November promises to deliver on one of our key goals for the year, which is to provide more **GREEN** subject matter. This month's meeting serves to remind us all how we can integrate technology, finance, and momentum to further energy efficiency and sustainability.

We have invited our friends from the local USGBC association as well.

....Don't forget our "+1 Program". "If you bring a first time guest to an ASHRAE meeting, lunch for you and your guest is FREE! That's a \$40 value!"

....Remember "ASHRAE Should Be a Benefit, Not a Burden."

....Our Chapter Goals:

1. Bring interesting programs and tours
2. Connect with other associations, such as USGBC and AIA
3. Increase focus on the next generation of ASHRAE leadership through building teams and attracting new members
4. Focus on Green subject matter to better support what is going on in our society, cities, and the world

Please be sure to reach out to your colleagues, customers, and others who may have interest in what is going on in ASHRAE and bring them to our next meeting.

All it takes is just **one more** and we grow, not only in size, but in focus,

Remember our next meeting on November 2nd and I look forward to seeing you there!

Regards,

Jeff Murphy MBA, PE, LEED® AP

ASHRAE RESEARCH CAMPAIGN '09 RESULTS

Ed Dusch, Chapter Research Chairman

This annual fund raiser is the backbone of ASHRAE's HVAC&R research. With the help of individual members and companies in our area, we exceeded our goal of \$14,000 with a total of \$14,220. Considering the turbulent financial times of late I think this shows an extraordinary commitment on the part of the donors. Please join me in congratulating the following for their generous contributions to last year's total.

\$3000 or more
